Subject: RE: high flow sampling tomorrow

Hello Kristen:

If things should change, Archil Zarnadze of Louis Berger is available tomorrow and during the weekend. We have him slated for oversight and split sampling next Tues-Weds on Newark Bay, but otherwise, he could assist you. His cell is (732) 763-9570. Sorry that I haven't been able to identify more staff immediately, but a number of our team are working on a deliverable that is due tomorrow. Another of our staff, Jordan Goldstein, might free up after tomorrow if you do have a need for assistance later in the event. Please contact me via cell or e-mail for updates/coordination, as I will be working remotely tomorrow until about 3:30 pm eastern.

Regards,

Len Warner
Project Manager | The Louis Berger Group, Inc.
(914) 798-3721 (office)
(973) 967-0647 (cell)

Ed,

Sorry, I was en route from Manchester office...

I don't know if you touched base with Ryan, but I think we are OK for tomorrow. We may need personnel this weekend, or early next week.

We will be in touch soon.

Thank you and Len very much for the offer!

Subject: RE: high flow sampling tomorrow

Ryan,

I left a message on your voicemail, but it would be good to reply to this email so others see the answers to my questions. We are checking on availability of HDR|HydroQual personnel, as is Len Warner at Louis Berger. Eugenia mentioned an 8 am start time. What would people need to bring with them? It would help us to know how long you will want the help - e.g. is it only tomorrow, or are you looking for help into the weekend?

Ed

Subject: high flow sampling tomorrow

Rob, Bill and Kristen,

Louis Berger and HDR|HydroQual are looking into staff's availability to assist AECOM with the sampling event tomorrow. Kristen, please let Len and Ed know how many days and how many people you need and please coordinate directly with them.

Thanks,
eugenia
